

**CURVATURE BASED METHOD FOR SELECTING FEATURES FROM AN
ELCTROPHYSIOLOGIC SIGNALS FOR PURPOSE OF COMPLEX
IDENTIFICATION AND CLASSIFICATION**

5

Abstract of the Disclosure

10 A method for curvature based complex identification and classification
comprises sensing a cardiac signal and computing curvatures at sample points on the
sensed cardiac signal. Then to extract features from the computed curvatures, and
compare the extracted features with a set of predetermined templates, and then to
classify the sensed cardiac signal based on the outcome of the comparison.
